Social Research that works for society

Culture, sport and wellbeing

Findings from the
Understanding Society adult survey
Appendix B: Tables

Authors: Jane Lakey, Neil Smith, Anni Oskala and Sally McManus

Date: 31/07/2017

Prepared for: The Culture and Sport Evidence (CASE) programme

At NatCen Social Research we believe that social research has the power to make life better. By really understanding the complexity of people's lives and what they think about the issues that affect them, we give the public a powerful and influential role in shaping decisions and services that can make a difference to everyone. And as an independent, not for profit organisation we're able to put all our time and energy into delivering social research that works for society.

Table 0:3 Adjusted changes in health and wellbeing scores from 2010/11 to 2013/14, controlling for longitudinal participation in arts activities and other socio-demographic factors	169

Appendix B: Reference Tables

The tables provide either percentages rounded to full percentage, or mean values of scores to one decimal place, as specified in the table headings.

Any cells with results relating to pairs of variables where the relationship is statistically significant (according to Wald test) are **shaded in blue**.

In Tables 0.1, 0.2 and 0.3, results from logistic regression, reference categories are noted with a †, and statistically significant differences (according to Wald test) are **shaded in blue** and noted with an *

In tables showing results for several column variables at the same time, only one unweighted base is shown for clarity of presentation; the bases for all the other variables in these cases are either identical or near-identical with slightly different number of item don't know and refusal answers in the survey.

Table 2:1 Proportion (%) participating in arts activities at least once in the past 12 months, by individual characteristics, England 2013/14

		Participation in any arts activities	Unweighted base
Age	16 to 24	74	1179
	25 to 44	75	5970
	45 to 64	78	7162
	65 to 74	78	3439
	75 or older	70	2257
Gender	Male	70	8862
